PROFESSIONAL SUMMARY

Computer and Communications Engineering student at Alexandria University seeking a software and programming internship. Hands-on experience across C/C++ systems, object-oriented design, data structures, and digital logic, plus a 150-hour project-based software engineering training program. Strong on clean class design, debugging, and shipping in a team — discipline carried over from long-term competitive swimming at Al Ittihad Alexandria Club.

EDUCATION

Alexandria University — Faculty of Engineering *Expected Graduation: 2028*
Computer & Communications Department · CGPA: 3.38

TECHNICAL SKILLS

Programming: C, C++, Python

Web: HTML, CSS

Practices: SDLC & Agile (JIRA), system design (high- and low-level), SOLID & design patterns, ISTQB software testing, version control with Git and GitHub

Databases: PostgreSQL, SQL

Engineering Tools: MATLAB, Simulink, hardware & logic circuit design

Creative: Photoshop, Premiere Pro, Illustrator · **Core strengths:** problem solving, debugging, object-oriented design

CERTIFICATIONS & TRAINING

Software Engineering Summer Training 2026 — Fuzetek *Jul – Sep 2026 · 150 hours*
Completed a 3-month, project-based program covering SDLC and Agile using JIRA, system design (high- and low-level), SOLID principles and design patterns, ISTQB software testing, advanced C++ with OOP, advanced algorithms and data structures, database management with PostgreSQL, and version control with Git and GitHub. [Certificate]

AWS Academy Graduate *AWS Academy · 2026*
Cloud Foundations · Machine Learning Foundations · Data Engineering · Cloud Developing [Verify on Credly]

MATLAB Onramp · Simulink Onramp *MathWorks · 2026*

PROJECTS

WhatsApp-Style Console Messaging Application — C++ / OOP
Team project modelling WhatsApp's core interaction flow around classes for users, chats, and messages, emphasising clean class design, encapsulation, and modular structure. github.com/mohamed8588/ST2026_G6_Project1

Big Integer Class — C++ / OOP
Team project building a custom BigInteger type supporting arithmetic beyond native integer limits through operator overloading, delivered as a reusable self-contained class. github.com/perohjohn/project-2

Hospital Management System — C++ / STL
Team project simulating hospital workflows with STL data structures: patient records, appointment scheduling, billing, room tiers, and a dual emergency triage system (FIFO queue plus a max-heap priority queue by severity).
github.com/Rahma1581/ST2026_G9_Project3

Game&Go Lounge Manager — C++17 / PostgreSQL / ImGui
Team project layering a lounge time-and-tab manager into Core, Domain, Database, and Presentation modules: PostgreSQL schema with foreign keys, CHECK constraints and indexes, C++17 domain models (branches, stations, sessions, reservations), and an ImGui/OpenGL desktop UI. github.com/ARefarag/Final_Project_G5

AVL Dictionary & Spell Checker — C / Data Structures
Self-balancing AVL tree storing and searching dictionary words, with rotations and a suggestion engine using in-order predecessor/successor lookups. github.com/khodary555/University-projects

Banking System — C
Complete banking system with account management, deposits, withdrawals, balance inquiries, and transaction handling, focused on structured programming and file persistence. github.com/khodary555/Bank-management-system

Digital Clock & Timer — Digital Logic / Hardware
Hardware clock and timer using seven-segment displays, counters, buzzer alerts, start/stop/reset, and 12/24-hour switching, plus a letter-display logic circuit.

LANGUAGES & SOFT SKILLS

Languages: Arabic — Native · English — Fluent · French — Conversational

Soft skills: Teamwork, communication, time management, critical thinking, adaptability, athletic discipline
